BULKHANDLING  
TECHNOLOGIES

Our world-class facilities in Kewdale, Perth incorporates over 3,000 sqm custom built workshop suitable for manufacturing, heavy assembly, fabrication and servicing of hydraulic equipment as well storage and several office areas.

### Industry leading products and intelligent solutions

Total Rockbreaking Solutions (TRS) is a full-service engineering and hydraulic equipment maintenance company, providing industry leading hydraulic attachments, boom systems and intelligent solutions to support Australia's mining, quarrying, construction, demolition, material processing and recycling industries.

With extensive industry-specific knowledge and experience we deliver products and services that improve safety, minimise downtime, and help you move more material at a lower cost.

### For all applications - big or small

#### Mining and Quarry applications

As specialists in the mechanical and hydraulic design of heavy-duty fixed boom systems, we can offer purpose-built rockbreaker boom, boom control system and hydraulic power unit for large-scale mining and hard rockbreaking applications.

#### Material Processing, Construction and Recycling applications

TRS is an authorised WA dealer for the Rammer, ALLU, SIMEX, PneuVibe and Daehan hydraulic attachments and we work with you and your operators to determine the correct and right sized attachment for any breaking, cutting, crushing, trenching, compaction, road construction or scrap recycling job.

### Keeping your equipment running at peak performance

Our range of quality and reliable products can operate in harsh conditions without missing a beat. But without proactive monitoring and maintenance there is a risk of unscheduled repairs that cause costly downtime.

Our experienced technicians ensure your equipment performs at its optimal efficiency at all times by servicing, repairing and rebuilding hydraulic attachments and boom systems in all makes and models in our state-of-the-art workshop facility in Kewdale, Perth. A dedicated Site Service Team attends the requests onsite when required.

A great range of genuine tools, parts, consumables and accessories are readily available in our warehouse.
