

# TRS appointed ALLU Transformer dealer in WA

ALLU Group is expanding its presence in Australia and has appointed Total Rockbreaking Solutions (TRS) as its authorised dealer in Western Australia for the ALLU range of Transformer hydraulic processing buckets.

Catering for applications of all sizes, and capable of processing any material that can be screened and sorted, the ALLU Transformer buckets transform feed materials into valuable products making processing jobs more efficient, more environmentally friendly and minimising the need for transportation of waste or replacement materials.

With the ALLU Transformer, material processing will be revolutionised as it converts the base machine into a mobile processing plant.

"There is no longer need to bring both an excavator and a screener on site when the ALLU Transformer can screen,

pulverise, aerate, mix, separate and load the materials you work with," explains Jeff Jackson, Sales Manager of TRS.

The ALLU Transformer will process just about anything including construction debris, topsoil, excavated soil and contaminated soil, clay, peat, bark, compost, glass, bio-waste, milled asphalt, coal, oil shale and limestone.

Unique design of screening blades and combs ensure the screening bucket is clog-free and maintains good production even with wet materials.

"The ALLU Transformer has been designed to transform the way in which construction businesses are able to improve their efficiency and profitability," says Ola Ulmala, President of ALLU Group. "ALLU Transformers are purpose built for efficient material processing by reducing the number of process steps needed and transforming waste

into useable material. This results in substantial savings in material, time and transport costs that means improved productivity and profitability to our ALLU customers."

Main applications include:

- Waste material handling
- Crushing and loading of raw material in mining and quarrying
- Composting
- Pipeline backfilling/padding
- Stabilising clay
- Crushing asphalt, minerals
- Cabling backfills

Manufactured for over 30 years and distributed to over 30 countries, reliable ALLU Transformers are now available in WA.

For more information contact Jeff Jackson at TRS on 1300 921 498 or visit [totalrockbreaking.com.au](http://totalrockbreaking.com.au).
